STOP TRANS GENOCIDE

T-Z-R.BSKY.SOCIAL

Written by your local He/Him

T R A N S F A G

According to multiple genocide scholars, the United States is already in the early stages of committing genocide against Transgender and gender queer people. With a drastic increase in targeting by right-wing politics, most of the United States has either considered or passed explicit anti-trans legislation in response to manufactured moral panic.

Human Rights Campaign: Fatal Violence Against Transgender & Gender Non-Conforming People in the United States 2025

SPEAK UP!

Silence is Death!!

If you have the ability, get loud! Use your privilege to speak up for those who can't!! Listen and elevate trans and POC voices! Don't let fear silence you, that is what they want. They want us to be scared, to be quiet. They will do their best to divide our community and further alienate trans people. Don't let them!

WHAT CAN YOU DO?

Call your Rep!

Look up who your rep is and contact them! Email, call, or write to them! Use the website *5calls.org* to keep track of state bills and find phone scripts! *tracktranslegislation.com* also has a script generator!

TRACKTRANSLEGISLATION 5CALLS

Stay Informed!

The current legislation will bombard you with terrible news and action from all angles. This is on purpose to overwhelm and distract you! Stay informed about which bills are being passed in your state where you can make a difference!

Support!

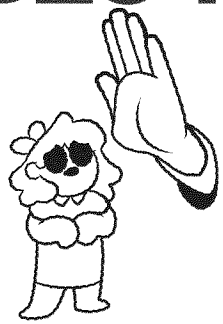
Reach out to your trans loved ones, see if your local trans organizations need volunteers or donations, attend protests, etc

These are just some of the amazing orgs fighting for trans rights in South Florida!

FL HB1521

Fl HB1521 forces one to use the bathroom aligned with the sex they were assigned at birth.

This forces trans people into dangerous situations, either break the law or expose themselves.

FL SB254


SB254 Blocks gender-affirming care for minors, taking away the child and parent's choice and denying access to best practice care based on moral panic over science
